

REMARKS

The Notice of Allowance dated April 11, 2005 allows all pending claims 21-40.

Applicant discovered a typographical error in claim 21 and called the Examiner during the week of June 13, 2005 to get pre-approval for the amendment. Specifically, the first element of claim 21 claims

"operating a transceiver in a first mode of operation comprising one of an analog mode and a digital mode;"

a subsequent element should then claim switching to "**the other of**" the analog mode and the digital mode". Thus Applicant amends the subsequent element to read

" switching operation of the transceiver to a second mode of operation comprising the other of the analog mode and the digital mode"

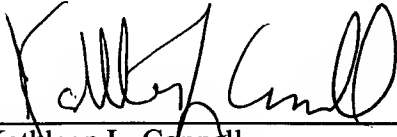

For example, if the transceiver is operating in the analog mode, then the switch in operation must be made to the digital mode, and vice versa.

No other changes have been made to the claims. Applicant asserts that this change does not alter the scope of the claim, and in fact, conforms to the Examiner's reasons for allowance in which he states that "the prior art of record does not specifically disclose the step of changing a clock signal corresponding to operation modes (analog to digital or vice versa)."

Applicant respectfully requests that the amendment to claim 21 be entered as to be reflected in the issuing patent. The Examiner is invited to contact the Applicant's attorney at the below listed telephone number if there are any questions regarding this amendment.

Respectfully submitted,

Dated: July 7, 2005
